CFT036C_1D00_WLP_IMAGE_PROCESS

We no longer monitor this job as the "VA Richmond Images" process has changed. Filenet and CDT will be taking over this process.

- COPS SME INSTRUCTIONS

1. Purpose:

This job group processes the images for the WLP paper claims and loads them to Macess. If it does not run, there will be no images in Macess for the WLP Paper claims, which will impact multiple teams.

Business Impact

We need these images so we can get pended claims resolved and adjudicated. If we do not, we run the risk of missing TATs and incurring interest and penalties.

If there is any issue with this job, please check inbox for "VA Richmond Images Missing." If an email from Annette is present, please reach out to COPS SME.

SLA to receive the daily file is 1AM; however, the WGS Filenet team owns the source for the files. If the file has not been received and loaded by 6AM, we should request an update from the Filenet team on an ETA when we will receive the file. Once the file has been received, then it should kick off and run quickly.

- CFT036C_2D00_WLP_IMAGE_PROCESS
  - A process on the FileNet side will extract the tif images for the DCN and send in a zip folder to \\va1ops04\ProdTransferFiles\Wellpoint\ITMacess\From
  - Tidal job will unzip the tif images
  - CFT036C_0030_WLP_CLAIM_ATTACH_MOVEFILES
    - This job will execute a C# script to read the tif files in the folder, create an entry in the [CLAIMS_RECON].[dbo].[ClmAttachmentTracking] for the DCN and filename and archive the file in \\va01pstodfs003.corp.agp.ads\apps\CIFT IMAGES\sherpadata\Images\WLP
  - CFT036C_0060_WLP_CLAIM_IMAGE_RECONCILE
    - This job will exectute a C# script to generate an XML file to load the images to Macess
      - \\va01pstodfs003.corp.agp.ads\apps\Global\Macess\Prod\Document_Import\ToDo

2. General Info:

Priority	1
Process location	N/A
Calendar	Daily
Scheduled Start Time	1AM
SLA	6:00 AM
Internal Notifications - Initial	COPS SME On-Call
Customer Notification - Secondary	N/A
Broadcast distribution list - Final	N/A

3. Pre-Requisites

File path must be stable.

4. Job Steps

Steps	Explanation	Dependency	Command	Procedure	Failure Instruction
CFT036C_0000_MOVE_FILE_TO_DROPOFF	IF EXIST \\va01pstodfs003.corp.agp.ads\apps\Global\Macess_Operational_Storage\Prod\FTP\FileNet\From*WMU*CLAIMS_IMAGES*.ZIP MOVE \\va01pstodfs003.corp.agp.ads\apps\Global\Macess_Operational_Storage\Prod\FTP\FileNet\From*WMU*CLAIMS_IMAGES*.ZIP <C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF\	1:00 AM - 10:00 PM	cmd	/c IF EXIST \\va01pstodfs003.corp.agp.ads\apps\Global\Macess_Operational_Storage\Prod\FTP\FileNet\From*WMU*CLAIMS_IMAGES*.ZIP MOVE \\va01pstodfs003.corp.agp.ads\apps\Global\Macess_Operational_Storage\Prod\FTP\FileNet\From*WMU*CLAIMS_IMAGES*.ZIP <C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF\	Rerun job step. If it fails again, excalate to COPS on call.
CFT036C_0025_MOVE_SMD_FILE_TO_DROPOFF	IF EXIST <C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\SMD_837_IN\tiff*.tiff MOVE < C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\SMD_837_IN\tiff*.tiff <C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF\	1:00 AM - 10:00 PM CFT036C_0020_ARCHIVE_ZIP_FILES [\CLAIMS\CLA036C_2D00_WLP_IMAGE_PROCESS] = Completed Normally	cmd	/c IF EXIST <C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\SMD_837_IN\tiff*.tiff MOVE < C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\SMD_837_IN\tiff*.tiff <C_ECGATEWAY_SERVER_2012.10527>\POSTOFFICE\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF\	Rerun job step. If it fails again, excalate to COPS on call.
CFT036C_0030_WLP_CLAIM_ATTACH_MOVEFILES	Runs the D:\AGP\APPS\VENDOR_PROCESS_CLAIMS_ATTACHMENTS_WLP\Vendor_ProcessClaimsAttachments.exe executable from VA22PWVISS315 Server by passing /movefiles as parameter This executable moves the .tif files from \\va22pwviss315\POSTOFFICE\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF\ to \\va01pstodfs003.corp.agp.ads\Apps\CIFT IMAGES\sherpadata\Images\WLP\ folder. It then creates an entry in the ClmAttachmentTracking table in CLAIMS_RECON DB for the ImageName and DCN for the current date with Status as 25. The DCN is usually the name of the file without extension.	1:00 AM - 10:00 PM CFT036C_0025_MOVE_SMD_FILE_TO_DROPOFF = Completed Normally	D:\AGP\APPS\VENDOR_PROCESS_CLAIMS_ATTACHMENTS_WLP\Vendor_ProcessClaimsAttachments.exe	/movefiles	Rerun job step. If it fails again, excalate to COPS on call.
CFT036C_0040_WAIT_60SECONDS	Wait step for 60 seconds	1:00 AM - 10:00 PM CFT036C_0030_WLP_CLAIM_ATTACH_MOVEFILES = Completed Normally	d:\Program Files7Tidal\Agent\bin\sleep.exe		Rerun job step. If it fails again, excalate to COPS on call.

CFT036C_0050_EDINET_UPDATE_CA_LTSS_LENGTH	USE CLAIMS_RECON update CLAIMS_RECON.dbo.ClmAttachmentTracking set dcn = '20' + dcn where status = '25' and len(dcn) = 11 and DCN not like 'KS%'	1:00 AM - 10:00 PM CFT036C_0040_WAIT_60SECONDS [\CLAIMS\CLA036C_2D00_WLP_IMAGE_PROCESS] = Completed Normally	osql	/c -S<EDINET_SERVER.1964> -U<APP_EDINETCLAIM_USER.1951> -P<APP_EDINETCLAIM_PWD.1950> -Q" USE CLAIMS_RECON update CLAIMS_RECON.dbo. ClmAttachmentTracking set dcn = '20' + dcn where status = '25' and len(dcn) = 11 and DCN not like 'KS%'"	Rerun job step. If it fails again, excalate to COPS on call.
CFT036C_0060_WLP_CLAIM_IMAGE_RECONCILE	Runs the D:\AGP\APPS\VENDOR_PROCESS_CLAIMS_ATTACHMENTS_WLP\Vendor_ProcessClaimsAttachments.exe executable from VA22PWVISS315 Server by passing /reconcileimages as parameter This executable creates an xml in the \\agpcorp\apps\Global\Macess\PROD\Document_Import\todo\ folder with the name MacessXMLImportFiles_MMddyyyyHHmmss.xml for the list of the claims from the CLAIMS_RECON.dbo.view_XMLImportingKS view. The view returns the list of the claims that are in status 25 with the Trading Partner code as ANTHEM, SMARTDATA, KANCARE0P and EDOC_FLAG <> 'Y'. Once the xml file is generated the Status is updated to 50 in the ClmAttachmentTracking table based on the DCN and EDOC_FLAG is updated to Y and EDOC_DT to the current date in yyyyMMdd format in the T837ClaimStatus table based on the TPClmNbr.	1:00 AM - 10:00 PM CFT036C_0050_EDINET_UPDATE_CA_LTSS_LENGTH [\CLAIMS\CLA036C_2D00_WLP_IMAGE_PROCESS] = Completed Normally	D:\AGP\APPS\VENDOR_PROCESS_CLAIMS_ATTACHMENTS_WLP\Vendor_ProcessClaimsAttachments.exe	/reconcileimages	Rerun job step. If it fails again, excalate to COPS on call.

Failure Instruction Details

The job steps rarely fails as most of them are file transfer operations and couple of executables. **If the job fails for any network issues or connection issues, rerun the job step.** Here is one example of failure. Per Ramkumar on 1/4/2023, it is okay to ignore if this job times out after it is reran because new runs start at 12:00 AM.

Troubleshooting missing files and images: If we are receiving a report of missing images for Anthem, it is usually because this job has not ran due to missing file for step 1 in process above.

You can use this document to troubleshoot missing images and follow up with the WGS Filenet team link to: PEGA CCOP and Macess Missing images

COPS SME INSTRUCTIONS

1. If being called for job being timed out for the day with no runs do the following:
   a. Check \\VA22PWVISS315\postoffice\WLP_837_IN\CLAIMATTACHMENTS\ARCHIVE\IMAGE_REQUEST if CFT303J generated an image request for the day. If it did not then no action needed.
   b. If there is an image request for the day, then check \\VA22PWVISS315\postoffice\WLP_837_IN\CLAIMATTACHMENTS\ARCHIVE\ to see if there is .zip for the day.
   c. If there is a zip no action needed unless we receive an email next morning from Macess/Workflow Manager (at this time there is nothing to indicate that Macess/Workflow manager is going to be missing files or images possibly the next day.)
   d. If there isn't a zip then send an email to FileNet copying Annette(or the Macess/Workflow Manager POC at that time) stating we requested images at XX time(modified date time of the .txt file in the image request path above.) Include the .txt file.
      i. Filenet will not respond until the next morning, so pass it down or check in the AM.
         1. Video Tutorial

> **Video too small?**
>
> (If you are having trouble viewing video then try pressing CTRL on your keyboard and scrolling up or down on your mouse to make the video bigger.)

      ii. If Filenet responds they did receive the request and sent the images, they would provide a zip.
         1. You will submit a ticket to Axway MGFT asking for the status of the the zip.
         2. https://elevancehealth.service-now.com/ess?id=sc_cat_item&table=sc_cat_item&sys_id=75da16ab1bbd8cd02861fc038d4bcb98
         3.

Field	Input
Request Type	File Status Lookup
File Name and Format	Provide ZIP file from Filenet

Pickup location	FileNet Elevance
Delivery Location	\\VA22PWVISS315\postoffice\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF \\VA22PWVISS315\postoffice\WLP_837_IN\CLAIMATTACHMENTS\ARCHIVE
Comments	Please email the status of the aforementioned file to dl-atlasops, atlasops@anthem.com, and dl-COPS-GBD_ClaimsIT_Operation <dl-cops-gbd_claimsit_operation@anthem.com> Please redeliver the file if necessary.

4. Email Axway with the ticket number(important as they will otherwise take a few days to address the ticket.)
5. Wait for response. If they said it was delivered check the archive location to confirm, follow up asking it to be redelivered if it was not.
6. If Axway says they never received the .zip, request FileNet resend, once resent, confirm it is in dropoff and archive and rerun CLA036C.
7. Once complete confirm with Annette that she is seeing images.

iii. If Filenet says they did not receive the request, then fill a ticket with Axway to check on the status of the request file.

1. https://elevancehealth.service-now.com/ess?id=sc_cat_item&table=sc_cat_item&sys_id=75da16ab1bbd8cd02861fc038d4bcb98
2.

Field	Input
Request Type	File Status Lookup
File Name and Format	Provide ZIP file from Filenet
Pickup location	\\va01[stodfs003.corp.agp.ads\global\Macess_Operational_Storage\Prod\FTP\FileNet\To
Delivery Location	Filenet Elevance
Comments	Please email the status of the aforementioned file to dl-atlasops, atlasops@anthem.com, and dl-COPS-GBD_ClaimsIT_Operation <dl-cops-gbd_claimsit_operation@anthem.com> Please redeliver the file if necessary.

3. Respond to email, adding and tagging Axway asking for the status of the .txt request file.
4. They will either respond that it was delivered successfully to FileNet or that they redelivered it.
    a. If it was successful then wait for a response from Filenet. (use discretion- we may need to ask Axway to redeliver it)
    b. Once Filenet receives the request they will send the .zip, confirm by checking the archive and Dropoff locations. Rerun CLA036C as necessary.

See below if we did have a zip file and CFT036C did not succeed.

There are likely emails regarding "VA Richmond Images Missing." Check CFT036C to ensure it succeeded.

If it did not, check \\VA22PWVISS315\postoffice\WLP_837_IN\CLAIMATTACHMENTS\ARCHIVE for whether we received the day's file.

If we did, and there's nothing in \\VA22PWVISS315\postoffice\WLP_837_IN\CLAIMATTACHMENTS\DROPOFF, you'll need to **copy** from Archive location to Drop Off. Then you'll need to move the file(s) from Archive to Hold.

This completes step CFT036C_0000_MOVE_FILE_TO_DROPOFF.

Next, you'll want to Insert a New Occurrence of CLA036C_0010_UNZIP_FILE and Override Dependencies.

Once this step completes, you'll submit a ticket to Insert a New Occurrence of CFT036C_0020_ARCHIVE_ZIP_FILES, CFT036C_0025_MOVE_SMD_FILE_TO_DROPOFF, and CFT036C_0030_WLP_CLAIM_ATTACH_MOVEFILES. **Do NOT override dependencies.**

Once step 30 completes, Insert a New Occurrence of CFT036C_0050_EDINET_UPDATE_CA_LTSS_LENGTH and Override Dependencies.

When step 50 completes, Insert a New Occurrence of CFT036C_0060_WLP_CLAIM_IMAGE_RECONCILE.
