CFT201_1D00_COPS_SLA_FLEXCLONE_CHECK

1. Purpose:

This job checks if the flex clones are available for following databases and runs in loop every 5 minutes until the database is online. Once the DB is available the job step/group completes normally.

1. EDINETCLAIM
2. EDINETCLAIM_HISTORY
3. XCCLAIMS
4. ERDB
5. CLAIMS_RECON

2. General Info:

Priority	1
Process location	N/A
Calendar	Daily
Scheduled Start Time	6AM
SLA	N/A
Internal Notifications - Initial	Call COPs SME dl-cops-gbd_claimsit_operation@anthem.com
Customer Notification - Secondary	N/A
Broadcast distribution list - Final	N/A

3. Pre-Requisites

6:00AM

EDW001M_0035 = Completed Normally

4. Job Steps

Steps	Explanation	Dependancy	Command	Procedure	Failure Instruction
CFT201_0001_EDINETCLAIM_FLEXCLONE_CHECK (1)		6:00AM - 10:00AM			N/A
CFT201_0005_ERDB_FLEXCLONE_CHECK (1)		6:00AM - 10:00AM			N/A
CFT201_0010_CLAIMS_RECON_FLEXCLONE_CHECK (1)		6:00AM - 10:00AM			N/A
CFT201_0015_XCCLAIMS_FLEXCLONE CHECK (1)		6:00AM - 10:00AM			N/A
CFT201_0020_CLAIMSTATUSHISTORY_FLEXCLONE_CHECK (1)		6:00AM - 10:00AM			N/A
CFT201_0025_APP_CLAIMS_ODW_USER_CHECK (1)		6:00AM - 10:00AM CLA201_0005_ERDB_FLEXCLONE_CHECK (1) = Completed Normally			This step will fail when this user APP_CLAIMS_ODW is not available in ERDB. If this step fails we need reach out to SQL DBA to see if that user is available on ERDB database. Refer to the Failure Instructions below for examples.

Failure Instruction Details

If multiple steps failed

Check with SQL DBA as its most likely a flexclone issues. If ERDB and EDNIET have not finished these steps will fail. Wait until the flexclones complete, and you can rerun the job steps. If past the time dependency you can rerun and override.

Example:

https://kanbanflow.com/t/p26rRj9H

CFT201_0025_APP_CLAIMS_ODW_USER_CHECK

This step will fail CFT201_0025_APP_CLAIMS_ODW_USER_CHECK when this user APP_CLAIMS_ODW is not available in ERDB.

If this step fails we need reach out to SQL DBA to see if that user is available on ERDB database. Refer the below email and sent email to the same recipients. Reach out to Rohith or David if you have any questions.

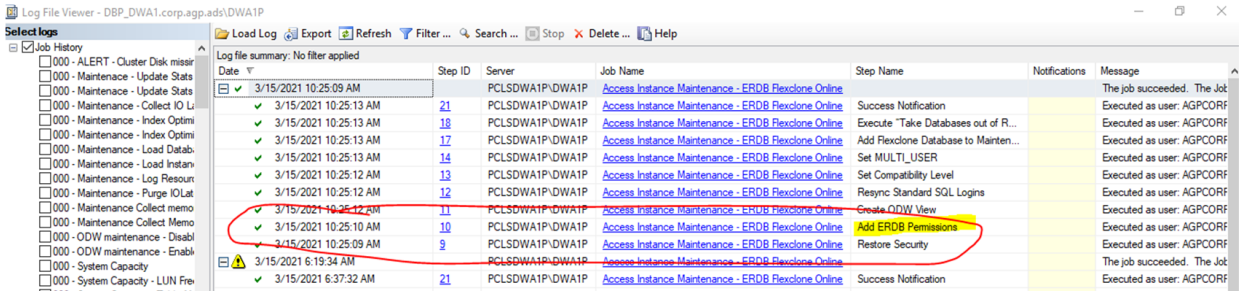
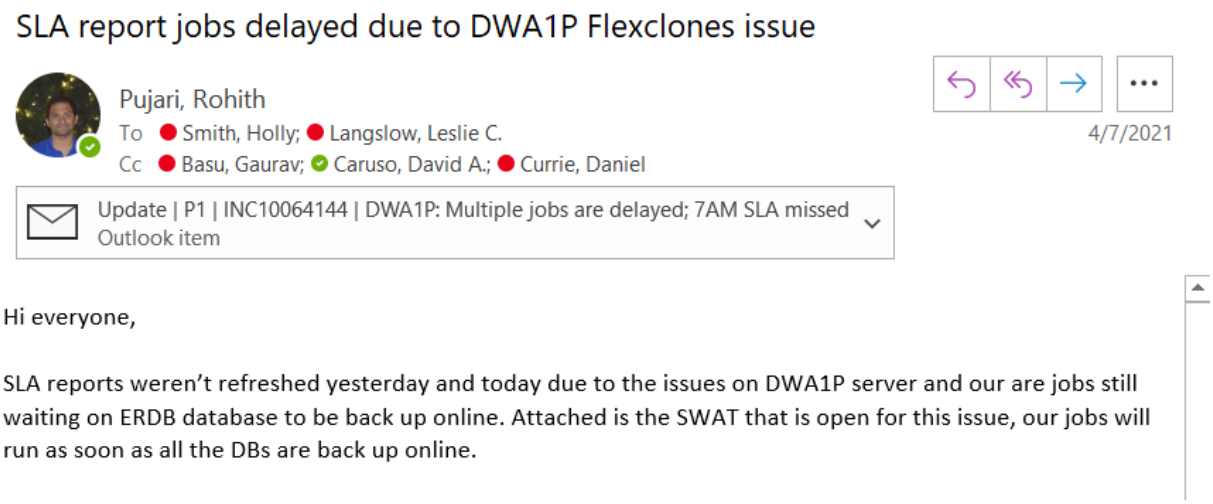
Subject: RE: APP_CLAIMS_ODW Accesses

Hi Rohith,

Try running the jobs again. In the logs, you had this error around 10:20am this morning, and there was an issue last night with the permissions step in the flexclone job. It was corrected by the steps being re-ran this morning around 10:25am, so yo just missed the window of correction. See below picture.



If this job is running past 4 PM and gets an alert check email from EDW ops to see if any Flexclones are delayed for the day. Send email saying the reports are refreshed for that day. CC Cassie Evans too.


Once the email is sent you can set the CFT201A to SKIPPED status and then CFT201 to cancel and SKIPPED status.
